## DESCRIPTION

The VANTEC-12A is a powered portable system with a multi-angle enclosure that permits stage monitor applications as well as a compact P.A. system.

The 1500 W<sub>peak</sub> power the Class D amplifier provides extended bandwidth, wide dynamic range and exceptionally low distortion-features hard to find on other systems in this market segment.

Digital Finite Impulse Response (FIR) filters are used in the signal processing of the powered Vantec systems. User configurable voicing, filter and EQ modes, and gain control are achieved by way of a rotary-knob interface and LCD screen on the rear of the cabinet. The Vantec series also allows users to wirelessly stream music from any mobile device

The 12F4 loudspeaker provides accurate low frequency reproduction. High frequencies are handled by the M-28 FEM optimized compression driver with 1" exit offering excellent performance.
