SOUND WITH SOUL

## KEY FEATURES

- Two-way long-throw system
- DX finish (Fiberglass) for direct exposure
- Horn loaded 12" low frequency loudspeaker
- M-78N neodymium compression driver
- Selectable passive/bi-amplified operating modes
- Tight 60° x 40° coverage angles
- Rotatable horns
- Stainless steel rigging kit

## DESCRIPTION

HQ-112.64 is a configurable, wide-range passive or bi-amplified two-way system designed for long-throw applications, providing efficient coverage over large distances. It is equipped with a 12" mid-low frequency driver, coupled to a high-Q waveguide to optimize coverage and performance, and an M-78N compression driver with a 1.5" titanium diaphragm. The system is optimized to deliver a clear and precise acoustic response. Additionally, it incorporates two rotatable waveguides, one for mid frequencies and one for high frequencies, facilitating installation in various configurations.

HQ-112.64 covers a frequency range of 80 Hz to 18 kHz, reaching a maximum sound pressure level of 143 dB SPL in passive mode. It has a power handling capacity of 400 W RMS and 1600 W peak in passive mode, with a nominal impedance of 8 ohms. In bi-amplified mode, the system handles up to 400 W RMS for mid frequencies and 150 W RMS for high frequencies.

The system is available in two versions: CX (Covered Exposure), which is protected with an ISO-flex coating both externally and internally, and DX (Direct Exposure), which adds an external fiberglass layer and an internal gel seal for enhanced weather resistance. Both versions comply with the IP54 standard, ensuring durability in demanding environments.

Equipped with M10 rigging points, HQ-112.64 offers controlled coverage of 60° x 40° in large venue, hall, or auditorium configurations and is designed to provide precise horizontal and vertical dispersion.
